

# BB

**ROBERT ALSOBROOK**

“Buff Bob”

Profile

Long time Colorado cowboy trying his hand at a new life. After twenty years ranching, a back injury has changed my life’s trajectory. I have learned to program and am ready for a new job and a new direction.

Summary

I have no relevant work experience in this field so I made a website, BuffBob.com, that showcases my talents. I built the website in python and flask and maintain the server for it and the other apps found there. Be sure to check out Tweestmasters.com, my bird image web scraper and classifier, other code projects, my github, etc. I built this site to act as the main way to display my talents given that I may have arrived here on a different path than most and a resume kinda seems pointless for now. I also got a oracle certification to prove my worth. Thanks and please visit--

Past Businesses

**Last Gulch Ranch / Owner**

*1999 - 2019*

A free range bison ranch. I also served on the board of a local land trust and hosted school groups and fund raising events for them. And donated buffalo for food and reintroduction efforts to several Indian tribes.

**Self Employed Carpenter**

*1995 - Present*

Highly skilled carpenter in all phases of home building

**Backcountry Pizza / Owner**

*1995 - 1999*

I can make some darn good pizza.
